Subject: Application – Development Manager with French

Dear Marino Recruitment Team,

I am writing to apply for **the Development Manager with French** position in Klaipėda.

I am **French and a native French speaker**, with a strong technical background and several years of experience working directly with customers. While sales was not my primary role, it was regularly part of my work as a technician. Customers trusted me to assess their needs, recommend suitable equipment and propose replacement solutions when repair was no longer the best option.

I believe my technical background, knowledge of the French market and ability to build trust with customers can be valuable in a business development position. I am also comfortable negotiating, defending my position and finding solutions while taking the other party's needs into account.

I am an autonomous, organised and very methodical person. I like things to be clear, structured and properly followed through, and I am comfortable taking responsibility for my work without constant supervision.

I currently do not speak Lithuanian, but I am committed to learning it. My partner lives in Klaipėda and I will be relocating there by the end of this year or the beginning of 2027.

I would be happy to discuss my experience and motivation with you in an interview.

Thank you for considering my application.

Kind regards,

HIRT Stéphane
